

REMARKS/ARGUMENTS

Minor changes are made to this specification. Claim 11 is canceled without prejudice. Claim 12 is amended to correct a capitalization error. Claims 1-10 and 12-13 are pending in the application. Reexamination and reconsideration of the application, as amended, are respectfully requested.

The Examiner has objected to the disclosure because of the noted informality that reference number 121 (page 9, line 20) should be reference number 158 (see Fig. 1). Applicant has corrected the noted informality.

The Official Draftsperson has objected to the Drawings. Appropriate corrected formal drawings are included with this response. In addition the examiner has objected to the drawings as failing to comply with 37CFR 1.84(p)(5) because reference sign 131 does not appear to be disclosed in the specification. Applicants submit that reference sign 131 is mentioned in the specification at page 11, line 24 as referring to "a 50 Ohm termination, or load 131". As requested applicants have provided a copy of the originally filed drawings with proposed drawing changes marked in red ink on figure 1. In addition, the corrected formal drawings submitted for approval with this response to reflect the proposed change, pending the examiners approval of the proposed change.

In view of the foregoing, it is respectfully submitted that the application is in condition for allowance. Reexamination and reconsideration of the application, as amended, is requested.

If for any reason the Examiner finds the application other than in condition for allowance, the Examiner is requested to call the undersigned attorney at the Los Angeles, California telephone number (213) 337-6700 to discuss the steps necessary for placing the application in condition for allowance.

If there are any fees due in connection with the filing of this response, please charge the fees to our Deposit Account No. 50-1314.

Dated: July 28, 2003
